- Custom case sizing
- NO Manifest fees
- NO storage fees
- Handle all transportation arrangements

Management & Consulting

- 25+ years in business management/supply chain & logistics
- 10+ years in the Michigan Cannabis Industry

MANUFACTURING PROCESS

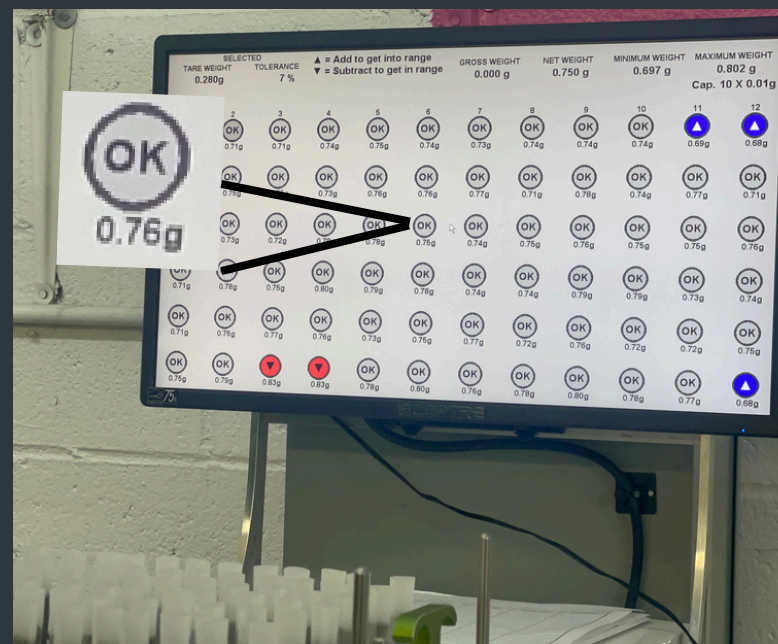

Using industry leading equipment and work force of 4, we are currently capable of producing up to 10,000 packaged, shelf ready pre-rolls per 8 hour shift. We have the equipment/resources necessary to start a second line, allowing us to double that capacity overnight if needed.

Material Prep

Material is milled (not ground) in our low rpm, high torque mill before getting sifted to remove any remaining stems to create a flavorful, proper burning pre roll.

Weighing

Using our state of the art scale, every pre-roll gets weighed (0.00g) before moving on, ensuring consistency and compliance.

Closing

Pre-rolls are closed with a “dutch crown” finish, giving a uniform look and assisting in starting a nice, even burn.

Labeling/Packing

A final QC check is performed before pre-rolls are packaged and labeled according to state regulations.

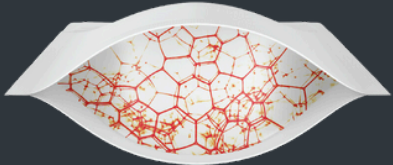

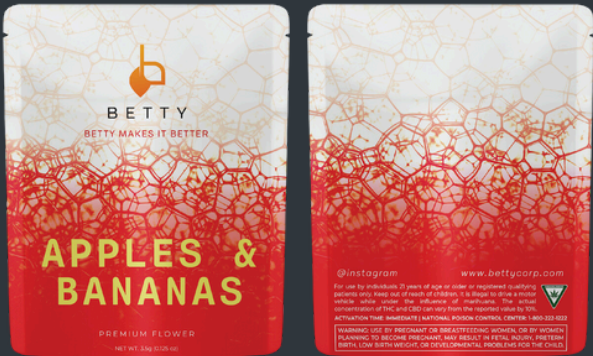

MANUFACTURING PROCESS, CONTINUED

Storage/Fulfillment

Products are boxed into customer specified case sizes. Once directed, Amplify will organize transport, create a manifest, and dispatch products to desired retail location.

PREVIOUS PROJECTS

1g Pop-Top Pricing

Service/supplies from Amplify	Cost
109mm cone (raw or zig zag)	\$ 0.10
